

Wire Figure Sculptures

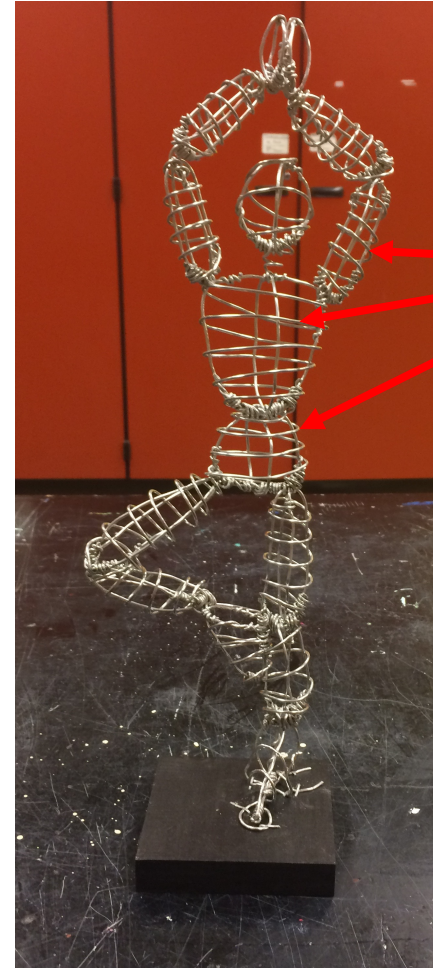

How to “Wrap” it Up!

To Finish: *This final step is optional*

Unfortunately I don't have anymore wire at home to show you how to finish your sculpture. However, I'm going to try to describe it to you here:

- 1) When you finish attaching all of your limbs and they are nice and tight, the last step is to use long pieces of wire to wrap around your figure to give it some extra support!
- 2) Begin by attaching the end of your long wire around the end of a limb, then coil that long piece of wire around and around your figure (see pic).
- 3) When you get to the end of your long piece of wire, wrap it around the nearest limb and secure it tightly.

****This step is OPTIONAL! If you have already run out of wire OR you don't think you need this step to secure your figure then don't worry about it 😊**

See the horizontal wire wrapped around the limbs here.

Final Sculptures will be "due" on Friday, April 10th
